

# Protect your Flat-Tappet engines with Cen-Pe-Co Engine Oil

*Not all oils today offer enough protection*

## Get The Facts:

1. There are many engines on the road today with Flat-Tappet cams, including 'B' Series 5.9L Cummins.
2. Many new oil formulations today DO NOT contain as much anti-wear additives as the same oils did previously.
3. New 2007 diesel engine oil specification CJ-4, has a reduction in zinc and phosphorus anti-wear additives.
4. Many gasoline engine oils are NOT adequately protecting camshafts and tappets, causing wear and failures.

## The Cen-Pe-Co Advantage

### **Superior Anti-Wear Protection**

Both, Cen-Pe-Co S-3 Engine oil and Cen-Pe-Co Super Racing oil have very high amounts of zinc and phosphorus anti-wear additives.

### **More Detergency**

Unique, detergent / dispersant technology keeps engines cleaner longer.

### **Superior Film Strength**

Cen-Pe-Co oils are fortified with 100% Pure Paraffin Base oil for outstanding protection.

**Use Cen-Pe-Co Engine Oils for Maximum Performance and Protection.**
