

How much do hairy warts cost you?

- Lost milk production due to sore feet
- Hoof trimmer or vet charges for wrapping sore feet.
- Effect of sore feet on overall animal health and reproduction.
- Excessive copper sulfate buildup in the soil.

CEN-PE-CO'S DAIRY CUSTOMERS ARE SAVING MONEY ON THEIR FOOT BATH PROGRAMS.

Cen-Pe-Co George II is a unique polymeric nonionic surfactant for agriculture. George II™ contains special dispersants and foam inhibitors. George II's™ unique penetration formulation aids in the break-up and dispersing of the water droplet and the powders (such as copper sulfate) added to foot baths. George II™ has NO medical value in and of itself but rather enhances the solution of the water/chemical mixture used in the foot bath treatment for hairy heel warts.

QUALITY PRODUCTS

HAIRY WARTS

How Much Are Hairy Warts Costing You?

- *Burklea Farms*
Franklin County, PA

“We have used George II for years in our herbicide tank, spraying crops and found that it facilitates mixing and penetrates the “target” a lot easier, so we added it to our chemical solutions in the foot baths and found that it worked well there too. George II is a cost effective way of treating our hairy heel wart problems and is a product that has helped our dairy operation.”

- *Travis Finn*
Finndale Farms
Oneida County, NY

“One hour after the first use with George II, we saw that the feet were more colored and the cows showed signs of the copper sulfate burning the feet more. We have cut back from running the foot bath 7 times to 3 times a week with good results!”

- *Hersmen*
Kulp Family Dairy
Blair County, PA

“Since adding George II to our copper sulfate & tetracycline solutions, we have gone from a major problem with hairy heel warts to a nil problem”

- *Tom Lalyer*
Lalyer Farms
Oneida County, NY

“We were using 25lbs. of copper sulfate in each foot bath, and are now using 10lbs. of copper sulfate with 1 quart of George II, and seeing similar results. The biggest advantage to us is that we have less copper sulfate going into our manure system. George II makes it a lot easier to mix the foot baths.”

- *John Marshman*
Marshman Farms
Chenango County, NY

“We are very happy with the results and endorse using Cen-Pe-Co George II in foot baths.”

- *T. Stoner*
Franklin County, PA
