

CEN-PE-CO DIESELMAX

Cen-Pe-Co DieselMax is a diesel fuel catalyst additive that reduces and uniformes the **droplet size of injected diesel fuel when injected**. **Central Petroleum Company earned two U.S. Patents (5,656,039 and 5,879,418)** for this technology in the development of DieselMax. DieselMax actually increases diesel fuel's combustion efficiency, and although it cleans injectors, it is not dependent on injector cleanup to save fuel. DieselMax improves fuel efficiency and boosts power, in addition to prolonging the life of fuel systems and engines. DieselMax is recommended in all diesel fuels and biodiesel blends.

THE CATALYTIC EFFECT:

- Increases horsepower up to 7.8%
- Reduces fuel consumption up to 8.9%
- Reduces soot**
 - Fewer regens
 - Reduces DEF consumption
 - Prolongs EGR and variable vane turbo life

OTHER BENEFITS:

- Increases Cetane 4 to 5 points
- Cleans and protects injectors and entire fuel system
- Restores lubricity to Ultra Low Sulfur Diesel Fuel
- Extends filter life
- Exceeds Cummins L-10 injector cleanliness requirements
- Exceeds Cummins N-14 injector wear requirements
- Inhibits the discoloration and degradation that occurs during storage or caused by the heat of electronic injection systems, thereby reducing filter blockage

BLENDING:

Cen-Pe-Co DieselMax is recommended at a rate of 1 gallon per 1,000 gallons of diesel fuel (1 pint per 125 gallons).
