

GRAPHITE CHAIN LUBRICANT

COMPOSITION:

Cen-Pe-Co Graphite Chain Lubricant is composed of pure paraffin base oils blended with special anti-wear and tackiness additives along with a selected grade of solid lubricant for a final viscosity of an SAE 50 motor oil.

CHARACTERISTICS:

- Low pour point -0°F, for ease of application
- High resistance to wash out by water
- Extremely adhesive to maintain lubricating film and resist throw-off
- Good penetrating properties to provide protective film for Pins, Bushings, Rollers and Link Plates
- Seals contacting parts from water and solid contaminants such as dust, sand or other abrasives.

USES:

Lubricating all roller chains except the small, high speed chains where light oils may be specified by the manufacturer.

Chains on farm machinery and quarry, gravel pit, and road contractors' equipment.

APPLICATION:

Apply with oil can, squeeze bottle, or paint brush to the inside of the chain on the slack strand.

**Available in 35 lb. pails
