## Happy Thanksgiving

Paul T. Webster III

Thanksgiving is always a good time to reflect back on the current year while giving thanks for all the blessings we have received. Our country and its citizens remain the beacon of hope and freedom throughout the world. Who else could or would lead the fight against the Ebola virus in Africa as we have done? When thousands of Christians in Iraq were trapped on a mountain by hostile and unforgiving forces, we used our military might for good and helped free them.

Currently our country is in great debate as to how to handle our current immigration concerns. Other than the Native Americans the rest of us are all either immigrants or the offspring's of immigrants and this fact makes this debate more personal for all of us. Just as our ancestors set their Thanksgiving tables to share and give thanks for their harvests, our citizens continue to lead the world in generous giving.

Thanksgiving Day connects us with the successes and traditions of our proud past and helps us take aim towards our future goals, just as the yearly tabulations of our Cen-Pe-Co sales totals help to guide us and our Company.

It appears that all of our efforts are leading the way for another overall sales gain this year. Our American made Lubricants and our dedicated American workers, sales team and distributors continue to lead the way for superior quality and performance.

I would like to thank everyone involved with our organization for making our 103<sup>rd</sup> year another success, and I wish our customers another bountiful Harvest.

# Instantaneous Power Increase

## A Farmers Test of Cen-Pe-Co Diesel Klenz

*By: Carl Schmidt, PA*

*Cen-Pe-Co Sales Representative*

In purchasing a new tractor, the service manager recommended I use a real good fuel conditioner, because they were experiencing deposits with ultra-low sulfur diesel fuel in their common rail fuel systems. He went on to say they would be testing the tractor's power using a dynamometer as they do for all new tractors going out. I suggested at the same time, we run a test of untreated and treated fuel using Cen-Pe-Co fuel treatment..

- The Test: To determine that Power Flo Klenz will increase power on its own merit instantaneously, in a new clean engine, at max power.
- Equipment: John Deere 7830 Tractor with 2.6 total hr.  
1950 engine rpm. 1000 pto rpm full load.
- Result of Test: Untreated - 192 pto hp. Treated - 196 pto hp.
- Conclusion: Cen-Pe-Co Power Flo Klenz diesel fuel treatment instantly increased pto hp greater than 2%.

## Quick Kleen Results

I want to let you know about some results that we have received from the sales of Cen-Pe-Co Quick Kleen Fuel Additive.

The gentleman pictured here brought in his 2003 Duramax diesel pick-up with 168,000 miles. It was running rough and had lost power and fuel economy. We immediately checked it with our scan tool and found that his injector balance rates were out of specification (they should all be less than 7 and his ranged from 7 to 15). Instead of having him buy all new injectors we suggested that he try a bottle of Cen-Pe-Co Quick Kleen, which he agreed.

After we put in one bottle to the 16 gallons that was in his tank, our technician went for a 15 minute road test. When he returned we did a retest on the injector balance and they were all less than 7 (right on spec). His engine was now running smooth, with power and fuel efficiency restored!

The customer left the shop with a couple of bottles of DieselMax to keep his truck running at its best!

A day later his wife called and wanted to know where they could buy more DieselMax, because they were heading to Texas and she said that the truck was running the best it ever had and she wanted to keep it that way!

She sent him right over to purchase a case to take with them!!

Hagedorn**

## **TERRY HAGEDORN**

FWD Truck Puller - Owner/Driver  
Engine & Chassis Builder

**Terry Hagedorn and his wife, Sheila have been pulling in the FWD Truck class for many years. In fact they were**

**one of the first pullers to switch to Cen-Pe-Co Oil when Cen-Pe-Co entered the sport in 1996.**

**Since then, Terry has gone on to earn 7 National Titles with: NTPA, Outlaw Pullers, ATPA, and the PPL pullers associations.**

**Cen-Pe-Co is proud to have Terry and Sheila promote our name at events across the country and sell our products in their shop.**

### *A Note From Terry....*

At Hagedorn Racing Engines our job is to provide our customers with a winning and dependable product.

Truck and tractor pulling is one of the most demanding sports that an engine builder has to deal with. At Hagedorn Racing Engines our engine program starts with Cen-Pe-Co oil products, working with Blaine and the guys at Cen-Pe-Co has enabled us to provide our winning motors the reliability that we needed to win 7 national titles, 6 of them in the last 8 years!

Many oil companies tell you how good their product is, but when you open up the washable oil filter on a 1900+ HP engine after an 18 second pass and its spotless, and you do that time and time again it makes you a believer, don't forget I am from Missouri the "show me state" .

Thanks to all the guys at Cen-Pe-Co for providing us with a great product!

Terry Hagedorn  
Owner, Hagedorn Racing Engines
